Assignment-1

Assignment 1: Write a SELECT query to retrieve all columns from a 'customers' table, and modify
it to return only the customer name and email address for customers in a specific city.

```
create table customer1(
id int primary key,
name varchar2(35) not null,
age int not null,
email varchar2(30)unique not null,
city varchar2(100)
);
```

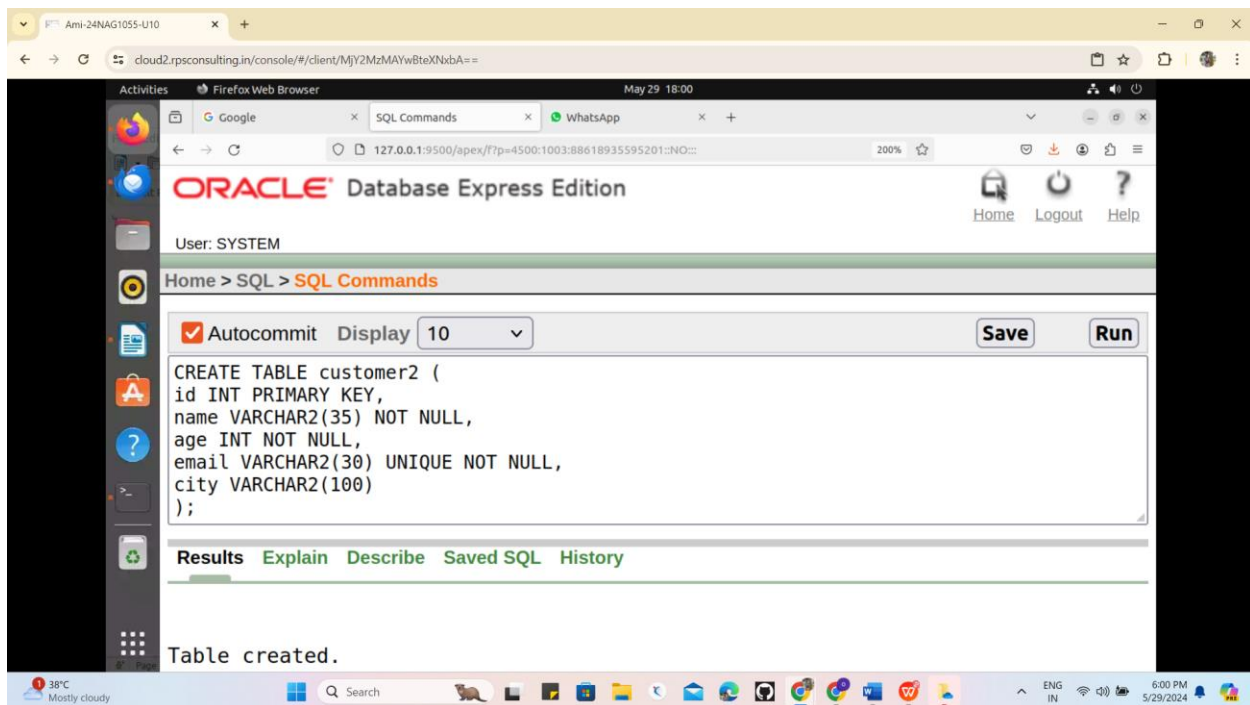

```
insert into customer1 values(1,'saicharan',23,'saicharan@gmail.com','bhopal');
insert into customer1 values(2,'sai',30,'sai@gamil.com','chennai');
insert into customer1 values(3,'charan', 28, 'charan@gmail.com','goa');
insert into customer1 values(4,'sai s', 35, 'sais@gmail.com','hyd');
insert into customer1 values(5,'charanreddy', 32, 'charanreddy@gmail.com','ap');
```
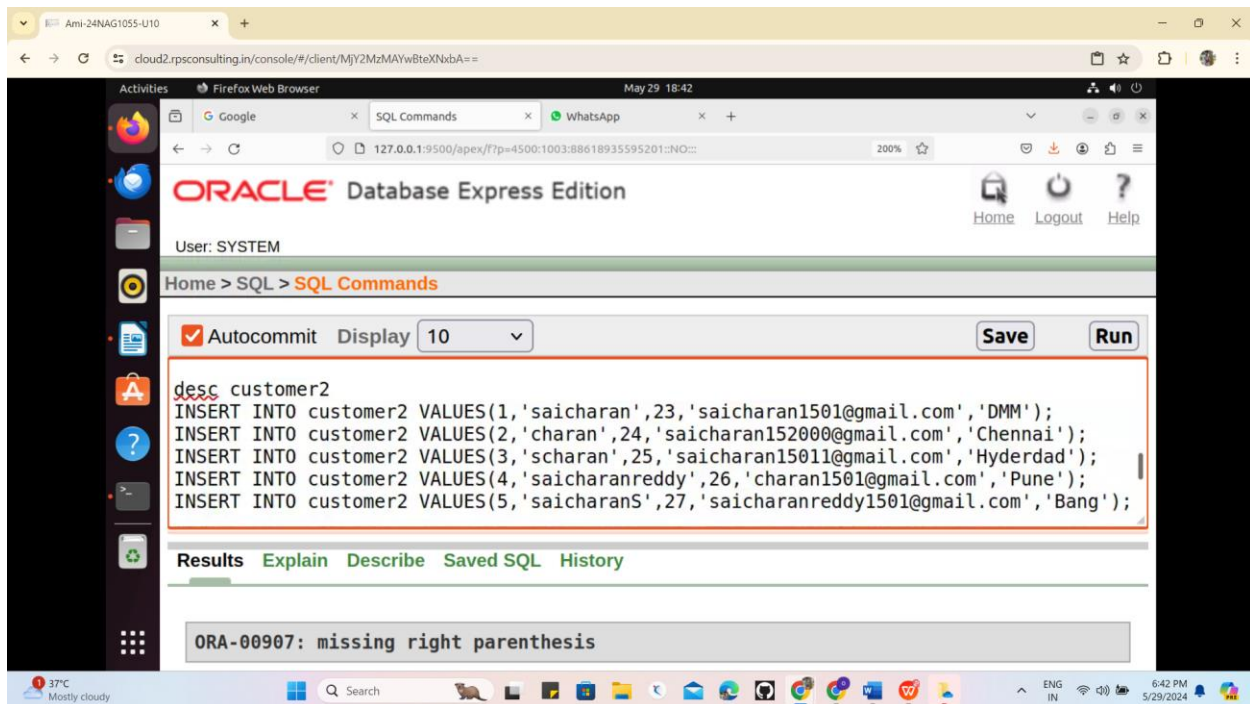

select * from customer1;

select name, email from customer1 where ='bhopal';
